

Name: _____ Date: _____

Work with a partner. Take turns modelling an activity. Bend your pipe cleaner mannequin to match your partner's pose. Use this to help you make a Henry Moore-style clay statue with smooth, curved surfaces.

Draw your finished statue, or take a photograph.

Modelling Ideas:

running	sleeping	sunbathing	dancing
pushing	throwing	crouching	sitting
lifting	jumping	crawling	walking

lifting	jumping	crawling	walking

Follow these instructions carefully. Ask an adult to help if you need to. You will need three 30cm-long pipe cleaners to make your mannequin.

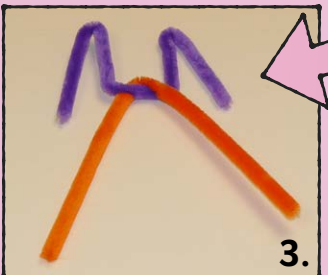

Fold the pipe cleaners in half, so you know where the middle is.

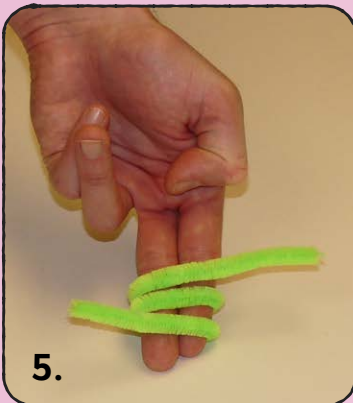

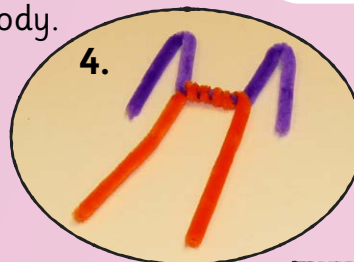

Let's start with the body. Put two fingers on the middle, then fold the ends up.

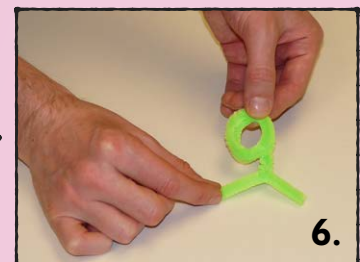

Fold the ends back down to make the arms. Make sure they're a bit longer than the body.

Wrap the leg pipe cleaner around the waist of the body.

Put two fingers in the middle of your last pipe cleaner. Wrap each end around your fingers once. This makes the head.

Attach the head to the body. Bend the arms and legs to make hands, feet, elbows and knees!

Twist the ends like this to make the neck and shoulders.
